PROFESSIONAL SUMMARY

Computer Science degree requirements completed at HIT. Built and deployed full-stack web applications using TypeScript, React, Node.js, Express, REST APIs, PostgreSQL and Prisma. Experience implementing authentication, validation, error handling and database workflows.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, C#; foundational Python

Frontend: React, HTML, CSS, Vite

Backend & Data: Node.js, Express, REST APIs, JWT Authentication, PostgreSQL, Prisma; foundational MongoDB

Tools & Other: Git, GitHub, Postman, Vercel, Render, Netlify; LLM API Integration

SELECTED PROJECTS

AI Crypto Advisor | React | TypeScript | Node.js | Express | PostgreSQL | Prisma

- Built a full-stack crypto dashboard with a TypeScript/Express REST API and a React frontend.
- Implemented JWT authentication, Zod validation, rate limiting and centralized error handling.
- Managed relational data using PostgreSQL and Prisma migrations; deployed via Vercel and Render.

StudyConnect - Academic Team Project | Node.js | Express | MongoDB | Socket.io | React

- Collaborated on an academic study-group platform featuring real-time chat and AI-generated quizzes.
- Project architecture includes an Express MVC API, session authentication, Mongoose models and search.
- Integrated functionality includes Socket.io group messaging and Gemini-powered quizzes.

AI Resume Copilot | Python | FastAPI | React | Gemini Embeddings | RAG | pytest

- Developed a resume-to-job-description analyzer returning structured matching insights and interview questions.
- Implemented a tool-calling workflow with retry/fallback handling and retrieval using Gemini embeddings.
- Wrote automated pytest tests with mocked LLM responses to cover validation and failure scenarios.

EXPERIENCE

Coding Instructor | DigiTech | 2024-2025

- Taught HTML, CSS and JavaScript, guided coding projects and helped learners debug application behavior.

EDUCATION

B.Sc. Computer Science | Holon Institute of Technology (HIT)

Completed all academic requirements; degree conferral not yet confirmed.

Relevant coursework: Data Structures, Algorithms, Databases, Operating Systems, Object-Oriented Programming.

ADDITIONAL

Military service: IDF Search and Rescue Unit (2019-2022) | Languages: Hebrew (native), English (fluent)
